

You are invited to present an exhibit
at the
SciTech Festival April 21-25, 2004

*High School Career Days • College Program
Visitors of All Ages*

Visitors/students will:

- ✓ **Meet with cutting-edge industry experts.**
- ✓ **Experience interactive demonstrations.**
- ✓ **Explore college internships & high school job shadowing opportunities.**

The Pittsburgh International Science and Technology Festival (SciTech Festival) combines a festive atmosphere with guest speakers, provocative panel discussions, hands-on workshops, special events and presentations by corporate, academic, and professional societies who share the science and technology behind what they do. These interactive demonstrations are a cornerstone of Festival programming at Carnegie Science Center.

The SciTech Festival enables the public, high school students, and college students to understand the role of science and technology in our region. It is an opportunity for academia, corporations, and professional societies to educate and communicate. This is a great time for students to explore career opportunities as they meet the region's technology leaders.

We look forward to your participation in this community event that connects science, technology & fun!

Sincerely,

Gerri Baker
